Remarks:
<ul style="list-style-type: none"> ➤ When the current goes through the primary pin of a sensor, the voltage will be measured at the output end. ➤ Custom design is available for the different rated input current and the output voltage. ➤ The dynamic performance is the best when the primary hole is fully filled with. ➤ The primary conductor should be <math>< 100^{\circ}\text{C}</math>.
WARNING : Incorrect wiring may cause damage to the sensor.
